The grid at the top of this page is designed for a horizontal bar chart. You will need a crayon to colour in the bars as you progress through the levels of Numbasics. Begin with level 1 and colour in squares, starting from the left showing how many questions you got right out of 24. If (and only if) you get all 24 questions correct you also colour in an area to show the time it took. As you get better on subsequent attempts you can add to the length of this bar. Assuming you complete the level in a shorter time your bar will grow showing your progress.

The second table on this page is for you to record brief notes reminding yourself what you need to revise before your next attempt. Good Luck!
